Question 4:

- Consider the elliptic curve: $y^2 = x^3 + 4x + 6 \ mod \ 11$.

   Let *P = (4, 3)* and *Q = (6, 9)*.   Find:

      - P + Q
      - 2P
      - 2P + 2Q

              (Show your calculations)
